About Me

Skilled in translating customer requirements into practical solutions. Prioritizing analytical prowess and data-driven decision-making to effectively oversee project management and product development. My knowledge of both Mexican and American markets gives me a unique perspective.

Education

Masters in Product Design

2010 - 2011

ELISAVA - Spain

BA in Industrial Design

2006 - 2010

ITESM - Mexico

Work Experience

Hitchiner Manufacturing Co. USA

2021-Present

New Product Engineer

- Directed projects with a laser focus on customer-centricity in the manufacturing and qualification of aerospace superalloy cast components, prioritizing customer needs at every phase.
- Spearheaded and successfully qualified numerous multimillion-dollar projects

Freelance Engineer USA/Mexico

2014-2021

Product Engineer

- I've adeptly navigated diverse projects, exercising proficient time management skills to deliver exceptional results.
- Engagements include CAD drafting for automotive products for Audison Italy, Craftsman, and Auto Termos de Guadalajara.

DEPSA

Mexico

2013-2014

Senior Product Engineer

- Spearheaded comprehensive responsibilities encompassing research and development, meticulous quality control of end products, and the critical evaluation, refinement, and endorsement of all project designs and concepts.
- Successfully launched appliances to the South American market
